#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 2, the last line, before "the entirety", --now US patent 6,677,269-- has been inserted.

The following is an examiner's statement of reasons for allowance: the prior art of record does not discloses or render obvious a process, as called for in claims 1 and 11, for alkylating an aliphatic or aromatic hydrocarbon with a hydrogen in the presence of a solid polymeric polyhydrogen fluoride complex as defined in the specification on page 3, lines 18-25. The closest art Pham et al disclose using HF catalyst having a polymer support. However, Pham clearly disclose that polymer cannot form a complex with HF (col. 1, lines 53-56). Therefore, one having ordinary skill in the art who combines the liquid onium polyhydrogen fluoride complex disclosed by Olah with the polymer carrier of Pham would not expect a complex formed between the liquid onium polyhydrogen fluoride complex and the carrier. In other words, if a complex could be formed, this combination would destroy the Pham teaching since Pham does not want a complex between the hydrogen fluoride and the carrier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
